Special Conditions:

- (1) In lieu of frequency tolerance, the occupied bandwidth of the emission shall not extend beyond the band limits set forth above.
- (2) Licensee should be aware that other stations may be licensed on these frequencies and if any interference occurs, the licensee of this authorization will be subject to immediate shut down.
- (3) Prior to commencing operations in the 2232-2240 MHz and 2242-2250 MHz band, 3G Wireless, LLC. is required to provide the Air Force (jimmy.nguyen@us.af.mil) with stop buzzer POC info.
- (4) All operations in the 1436-1452 MHz band shall comply with the limits of unwanted emission recommendations specified in ITU Resolution 750 (Rev. WRC-19).
- (5) This frequency assignment in one of the bands 1435-1525 and 2360-2395 MHz was coordinated prior to authorization with the Area Frequency Coordinator (AFC), who also coordinated it, as appropriate, with Aerospace and Flight Test Radio Coordinating Council. Use of this frequency under the authority of this assignment is subject to such further coordination with the AFC, as necessary to ensure compatibility with existing uses.
- (6) Operations are non-interference basis to Flight Test telemetry.

Special Conditions:

- (7) 3G Wireless, LLC. should be aware that the band 2200-2290 MHz is allocated for federal operations and is an extremely congested band. Non-federal use is on a case-by-case basis with approval of requests for operational and long-term use being highly unlikely. 3G Wireless, LLC. should have no expectations of approval in this band in future submissions.
