Subject: Additional Information Request

Message:

Please address the following questions and concerns.

1. The CubeSat that will be involved in this experiment is not identified. It will need to be identified, by name.
2. The information specified in 5.64 of the rules is required in order to authorize a ground station to communicate with that satellite.
3. The application indicates that the CubeSat is authorized by Papua New Guinea. We will need clarification. If this is a Papua New Guinea ITU filing, what is the name of the filing? Also, does PNG intend to register the satellite with the United Nations Office of Outer Space, and if so, can the applicant provide some documentation? If not, what country will register with the UN?
4. Are the U.S. earth station operations the only ones planned with this satellite (and does the PNG ITU filing reflect the full scope of ground station operations)?
5. The confidentiality request seems way overbroad. Please clarify.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of March 11, 2019 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
