Special Conditions:

- (1) In lieu of frequency tolerance, the occupied bandwidth of the emission shall not extend beyond the band limits set forth above.
- (2) The station identification requirements of Section 5.115 of the Commission's Rules are waived.
- (3) Licensee should be aware that other stations may be licensed on these frequencies and if any interference occurs, the licensee of this authorization will be subject to immediate shut down.
- (4) All customers participating in the experiment shall be informed that this operation is for experimental purposes only and can be cancelled at any time.
- (5) Prior to equipment authorization or a determination of compliance, the device must be accompanied by a conspicuous notice worded as follows: "This device has not been authorized as required by the rules of the Federal Communications Commission. This device is not, and may not be, offered for sale or lease, or sold or leased, until authorization is obtained."
- (6) All transmitting and/or receiving equipment used in the study shall be owned by the licensee.
- (7) Licensee is required to ensure that trial devices are either rendered inoperable or retrieved by them from trial participants at the conclusion of the trial. Licensee is required to notify trial participants in advance that operation of the trial device is subject to this condition.
- (8) Licensee must coordinate with all earth station operating in the 3650-4200 MHz band pursuant to 47 C.F.R. §25.251

Special Conditions:

- (9) Licensee shall use the minimum power level necessary to establish communications links to minimize potential interference to licensed users.
- (10) Licensee must avoid pointing the transmitting antenna within 10 degrees of any point on the geostationary orbit arc while transmitting the signals at the 38.5 GHz band.
- (11) AT&T Services, Inc. must coordinate with the Fixed Microwave Service licensees around each test site in accordance with 47 CFR, Part 101.103(d) prior to operation in 3700-4200 MHz, 24250-27500 MHz, 27500-28500 MHz, and 37000-40000 MHz (38500 MHz) bands.
- (12) AT&T Services, Inc. is required to maintain a roll-off value of -57 dBW/200 MHz or lower in the 23.6-24 GHz band to avoid causing RFI to the microwave sounders supporting NOAA.
- (13) AT&T Services, Inc. must secure consents from the Upper Microwave Flexible Use Service licensees in the proposed areas prior to accessing to 24250-27500 MHz, 27500-28500 MHz, and 38500 MHz bands.
- (14) AT&T Services, Inc. must coordinate with Fixed Microwave Service licensees in accordance with 47 C.F.R, Part 101.103(d) prior to operation in 3700-4200 MHz, 27500-28500 MHz, and 24250-27500 MHz bands.
- (15) With respect to operations in 3700-4200 MHz band, Licensee should be made aware that they must avoid causing interference to existing FSS earth stations in the band. For applicant's reference, a list of registered incumbent FSS earth stations in the band can be found at the following
link:<https://docs.fcc.gov/public/attachments/DA-20-823A2.xls>

Special Conditions:

- (16) Prior to commencing any operations in the 3700-4200 frequency band, experimental licensee must notify licensees of C-band earth stations. The notice must include the name and contact information of the stop buzzer personnel that will be available to cease operations in the event of reported interference. The notification should include the testing parameters (specific location(s), antenna gain(s), antenna height(s), antenna orientation, EIRP, EIRP density) and day and times of each test.
