Request for Info - STA File # 0342-EX-ST-2002- Reply

---

Message:

We would like to avoid transmit frequencies that will delay or add complexity to our STA request. I interpret from your email that some of the frequencies in our request (32-33 MHz, 38-39 MHz, and possibly 34-35 MHz) are likely not to require coordination with a local frequency coordinator or the WTB. We would like to leave those frequencies in the request and request that you delete the frequencies which you noted as being problematic. Frequencies to delete: 35-36 MHz, 39.5-40 MHz, and 72-73 MHz. Thank you

Eric Vogel
