

EXHIBIT 1

DESCRIPTION OF MODIFICATION

Cellco Partnership d/b/a Verizon Wireless (“Verizon Wireless”) hereby requests a modification of its experimental authorization WL2XGI in portions of the Minneapolis, MN and Bridgeville, PA areas. With this modification, Verizon Wireless seeks to 1) extend the testing radius at each site from 0.2 km to 5 km, 2) increase the number of mobile devices used in the testing to 30, and 3) correct the output power levels for the fixed and mobile devices.

Verizon Wireless will continue to coordinate operations under the STA with any nearby Earth Station licensees to avoid any potential disruptions to their operations. If those licensees do experience interference, Verizon Wireless will cease interfering operations.
