Message:

Good afternoon, Firefly is seeking the former - coordinate for ground testing and a launch to follow. Firefly has previously carried three separate FCC licenses: ground testing in Briggs, tx; ground testing at Vandenberg Space Force Base; and launch communication. We are looking to consolidate into a single license. This will be the most efficient form of licensing for both Firefly and the Commission since Firefly will only need to apply for a single license every six months, ensuring rolling coverage for all areas where our Alpha launch vehicle will be conducting RF transmissions.
