

March 2009

New Exhibit

General Atomics Aeronautical Systems, Inc. (GA-ASI) requires this frequency spectrum to support ongoing projects, under numerous government contracts with several U.S. Government Agencies, for Unmanned Air Vehicles with a broad range of scientific and military applications. To support its increasing business GA-ASI has opened a second flight test center at Palmdale close to its original Adelanto location.

Consequently GA-ASI desires to modify its existing license File: 0018-EX-ML-2009 call sign WC2XLR to include a new “fixed” facility that will use all of the same frequencies as the current Adelanto location but will be located in Los Angeles County at the following address:

GA-ASI
25500 East Avenue R-8
Palmdale, CA

This modification also includes adding 4 new frequencies to both facilities under call sign WC2XLR that are to be used for flight test support and have been assigned by AFTRCC.

Frequency	Power	Station Class	Emission(s)
123.225 MHz	7 W	FX	6K 00A 3E
123.325 MHz	7 W	FX	6K 00A 3E
123.475 MHz	7 W	FX	6K 00A 3E
123.550 MHz	7 W	FX	6K 00A 3E
