Output is at the antenna terminal of the device and must not exceed that tested for SAR compliance. This transmitter may operate with the 3 antennas and one Microphone speaker antenna listed in the filing in Push-to-Talk and body-worn configurations. Body-worn SAR compliance is limited to the specific belt-clip and speaker/microphone configurations listed in the filing. This device must be restricted to work related operations in an Occupational/Controlled RF exposure Environment. All qualified end-users of this device must have the knowledge to control their exposure conditions and/or duration to comply with Occupational/Controlled SAR limit and requirements. A label must be displayed on the device to direct users to specific training information for meeting Occupational Exposure Requirements and users must be provided with the training information. The highest reported SAR values are - Head: 2.55 W/kg (50% duty cycle); Body-worn: 5.20 W/kg (50% duty cycle).
