Subject: Nationwide justifications for KA2XTH and KA2XTI

Dear Mr. John Tolomay:

As we discussed during our phone conversation today, September 26, 2001, a justification for the "nationwide" use of the frequencies for call signs KA2XTH and KA2XTI is needed. Please send a MSWord document stating the need for the broad range of frequencies requested and the need for a "nationwide" experimental license. Also, if Harris Corporation tests experimental equipment units using these frequencies, please state the need for those quantities greater than 50 units.

Sincerely,

John Winston Kennedy
