Subject: Request for Info - STA File #0438-EX-ST-2007

---

Message:

Thanks for the feedback.

- 1) I have submitted an attachment describing the experiment. Please advise if you need add'l info.
- 2) I have not done any pre-ordination with the FAA although I have examined the Jeppesen database for location of air-ground communication ground stations using these frequencies. Please suggest how I might contact my regional FAA office for this co-ordination. (I was not aware such an option existed.)
- 3) The form seemed to require me to make the entry I did. Please understand that this request is for fixed/base service only. There is no intent for mobile use.

Lastly please note that I submitted payment via Form 159 over the internet today.
