Subject: Request for Info - File # 0464-EX-CR-2026

---

Message:

Applicant: Honeywell International Inc. File Number: 0464-EX-CR-2026 Correspondence Reference Number: 103576 Date of Original Email: 07/08/2026 Call Sign: WO2XUZ This renewal request is submitted to support the continued development of a small form factor radar system for a customer under experimental license WO2XUZ. During the current license term, RF testing has been conducted at the bench level to validate system performance and operational characteristics. To complete the development program, outdoor testing is still required and could not be accomplished within the prior authorization window due to scheduling and ongoing system refinement. All operations to date have been conducted in full compliance with FCC rules, within the authorized frequency bands, approved locations, and specified power limits. No harmful interference has been observed or reported. There have been no changes to locations, power levels, equipment, or test objectives from the existing authorization. Renewal is requested to complete the remaining outdoor testing and finalize system validation.
