

Exhibit No. 1
FCC Form 442
Items 3, 5(d)

By means of the instant application Input/Output, Inc. seeks to modify its current experimental license so as to authorize operations within the Continental United States as opposed to the Gulf Coast only. This modification will enable the applicant to test its equipment under a broader range of operating conditions, terrain, climate and the like. Except for the change in location, the particulars of the current authorization remain unchanged.
