Subject: RE: 0192-EX-CN-2016

Hi,

Here is our standard test plan:

- No communication to/from any entity; CW signal only, just the carrier, no modulation
- Full power transmit
- Reflector antenna pointed at zenith (straight up)
- Active transmission for 5 minutes at a time, up to several times per day, for a handful of days, for each system

The purpose of these transmit tests is to check for harmonic leakage into our other receive bands.

Thanks

Mark
