

Exhibit A
Request for Renewal

We, the Lockheed Martin Corporation, request a renewal of the station call sign WA2XSX. The renewal is based on the copy of the station authorization reflecting an expiration date of October 1st, 2007. An apparent subsequent authorization was issued correcting the date to October 1st 2005, which we do not have reflecting this new date. This request is for an authorization to replace the authorization in our position, with all previous technical data unchanged. Please see the attached documents reflecting the history of this authorization.
