Attn: Frequency Liaison Branch  
Office of Science & Technology

We, the Martin Marietta Corporation, would like to request at this time the renewal of five Experimental Licenses presently assigned to the Martin Marietta Corporation. These radio station authorizations are due to expire on June 1st. The different programs associated with these licenses have expressed a need, see attached documentation, to have their authorizations renewed at this time.

The authorizations we are requesting to be renewed at this time are: ~~KA2XPH~~ ~~KF2XDV~~, ~~KO2XBQ~~ and ~~KB2XCD~~. We have one license, ~~KB2XAW~~, due for renewal, which requires modification to one of their site descriptions, technical changes to the IFF assignments and the addition of several more test sites. Please see the attached documentation for details of these requests.

We would like to request at this time to cancel two existing authorizations, ~~KM2XBF~~ and ~~KM2XBG~~, as the program originally associated with these licenses has progressed onto more advanced stages and are now covered under other programs.

If you should have any problems or questions, please feel free to call the undersigned at 301-687-7000. If your questions relate to the technical nature of the authorizations call Andy Camarce at 407-356-0324.

Very Truly Yours,

  
Claude E. Wells
