

Motorola, Inc.
Application on Form 442 for
Experimental Radio License
0300-EX-PL-2006

ADDENDUM

Motorola stated in its original submission under File No. 0300-EX-PL-2006 that this application is intended to replace and supplement Motorola's existing special temporary authority ("STA") granted under File No. 0723-EX-ST-2005 and issued under call sign WC9XFA. Specifically, this application proposes to replace that STA authorizing experimental operations at one site (Loc. No. 1) in Omaha, NE, and at two sites in Utah. The application also proposes to add two additional sites in Omaha.

In addition, and as provided under Section 5.61(b) of the Commission's rules, 47 C.F.R. § 5.61(b)(2005), this application is intended to serve as a renewal or extension of Motorola's authority to operate as permitted under its STA pending action on the application. Motorola understands that such renewal or extension applies only to Loc. No. 1 in Omaha, NE, and the two sites in Utah; it must await action on the application for a regular license before it may operate at the additional sites in Omaha, NE (Loc. Nos. 2 and 3).
