

Request for Experimental License Modification

Northrop Grumman Systems Corporation in this application requests addition of the 7.25 – 7.900 GHz band to experimental license WK2XNE, FCC File No. 0308-EX-CM-2019. The request is to add to this experimental license long term authorization on the same frequencies and with the same technical parameters as that currently authorized by Special Temporary Authority (STA) WQ9XLN, FCC File No. 0747-EX-ST-2020. Additionally, a change in emission designator 2M00P0N to 2M00Q1N and in modulation types generally are requested. This authority continues to be necessary to conduct experimental operations required by Defense Contract No. HQ0727-16-D-0004.
