EXHIBIT 2
FCC FORM 442
ITEM 10

Northrop Grumman Corporation is required, under various purchase orders with Lockheed Martin Tactical Aircraft Systems to design, construct, and test APG-68VXm radars for use in F-16 aircraft contracted for sale to the nations of Greece and Israel, and potentially others. Future orders may include United States armed forces, necessitating compliance with current Department of Defense security requirements.

A typical test plan includes transmission from radar test labs at roof level, followed by in-flight transmission aboard flight test aircraft to simulate various operating scenarios.
