SUBJECT: (STA) Special Temporary Authority

To Whom It May Concern:

Northrop Grumman requests the filing of a (STA) Special Temporary Authority for MMDS/ITFS channel C4, whose frequency range is from 2.584 GHz to 2.590 GHz. The reason for the STA request is to provide drive testing in support of the New York Citywide Mobile Wireless Network. This wireless network will be used by New York City's public safety agencies to meet their broadband wireless requirements.

The intent of using the 2.5 GHz band is to test and implement an immediate solution with available commercial equipment until such time that 4.9 GHz equipment becomes available and is evaluated for this project.

If there are any questions they can be directed to the following point of contact:
