

Raytheon Missile Systems
Experimental License Renewal WD2XLE
File Number: 0551-EX-CR-2019

Exhibit 1 – Explanation of Continuing Experiment

Background: Raytheon Missile Systems uses this experimental license to provide differential GPS (D-GPS) correction signals to various programs to allow them to use precision positioning for testing for its DOD customers.

This license has been in place for some years. The program continues to have success in being able to create an extremely precise environment for the operation and testing of some of its missile systems, which are essential to the national security of the US.
