Pittsburgh, PA 15251-5315

Regarding: Application for Renewal of Experimental Radio Station Licenses KB2XIE
and KB2XDO

Gentlemen:

On behalf of SRI International, I am submitting the enclosed Application for Renewal of Radio Station Licenses, Form 405, for renewal of each of the above-referenced radio station licenses. I have been informed by our accounting department this past week, that our previous renewal application fee check has not been cashed (the renewal letter was dated 14 December 1993, copy enclosed). The enclosed renewal applications and fee are submitted to ensure we are current with all licensing requirements. SRI has operated this experimental facility for 30 years, without incident, conducting research for the U.S. Government. We are concerned that our request may have been lost or misplaced and want to ensure all licensing conditions are properly satisfied and current.

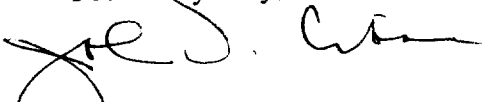

To assist the Commission in its consideration of this application, the station call signs and file numbers of licenses involved are listed as follows:

<u>Call Sign</u>	<u>File Number</u>
KB2XIE	1288-EX-R-91
KB2XDO	5427-EX-R-91

Also enclosed is SRI's check in the amount of \$90.00 to cover your fees, together with Form 159, FCC Remittance Advice form, for the above applications.

If the Commission has any questions or requires additional information for its consideration of this application please contact me at (415) 859-4285.

Yours very truly,

John W. Ciboci
Program Director
Systems Technology Division
