Special Conditions:

- (1) In lieu of frequency tolerance, the occupied bandwidth of the emission shall not extend beyond the band limits set forth above.
- (2) Licensee should be aware that other stations may be licensed on these frequencies and if any interference occurs, the licensee of this authorization will be subject to immediate shut down.
- (3) Licensee must coordinate with other users as necessary to minimize interference.
- (4) Any signal should be clearly identified as a test emission, and in no way appear to be airline communications.
- (5) Testing duration is 2 minutes max per 24 hour period for each frequency. Each frequency is only expected to be tested 1-2 times during the whole experimental license duration, though some may require additional sessions.
- (6) Testing on 131.550 MHz and 136.975 MHz needs to be coordinated in advance with the respective current users. On the day of testing, the respective current users will be notified for final approval, exact timings, etc.
- (7) A suitable POC will be available during testing if an emergency stop is required.
- (8) Operation the frequencies 121.15 MHz and 121.75 MHz must not exceed 0.02 Watt ERP.
- (9) Operation the frequencies 121.185 MHz through 123.125 MHz must not exceed 30 Watt ERP.
- (10) Operation is subject to prior coordination with FAA, ASRI and AFTRCC.
- (11) Stop Buzzer, Jeff Shaub, 405-610-5463
- (12) Experimental use is secondary to, and must not interfere with, Flight Test operations. The applicant must coordinate with other users as necessary to minimize interference. Renewal of this License is subject to prior coordination with AFTRCC Frequency Advisory Committee, www.aftccc.org
