

Response to Item #7 a-c

Transcom is requesting authorization under Section 5.56 of the Commission's rules to conduct Location and Monitoring ("LMS") (1) experimentation; (2) research; (3) technical demonstrations; (4) field strength surveys; (5) testing; (6) development of radio technique, equipment, operational and engineering data. The operation of the Transcom LMS systems as proposed here will contribute to the development and extension of radio technology to enhance the efficient use of the transportation infrastructure, improve mobility, reduce traffic congestion and enable quicker emergency response from public safety agencies.
