Subject: Request for Info - File # 0045-EX-CM-2026

Message:

The information in the FCC application is correct. It reflects an output power of 20 watts, with a resulting peak ERP of 324 watts. We did not request the use of an emission designator of 1M50D7W. The three emission designators in the FCC application are what is being requested: 22M6D7W, 11M3D7W, and 5M65D7W.

Thanks
Bruce
