Not until you're 18! But let's get back to your Experimental License applications. Please narrow your requirements: specifically, what do you want to do? School project? Hobby? Also, we need to address the issue of the filing fee: If you can't pay it, we will consider a letter from your school requesting a waiver of the fee because you are involved with a school-related project. Do not file any more experimental applications until we resolve the fee issue (we can amend the existing applications to tailor to your needs).
