---

Message:

Zenner is interested in acquiring a non-commercial experimental license to determine the regulatory feasibility of operating in the US ISM (902 to 928 MHz) band over satellite links. Zenner expects to partner with one or more satellite service providers to establish national demand for satellite-linked terrestrial sensors. One such partner is Lacuna Space operating LEOS LS4a (Lacuna Space designator) having NORAD associated designators NORAD ID (64841) 'LEMUR 2 KARENDARRELL'. This satellite does not, at present, have US market access.
