

Description of Permissive Change

The application is prepared for FCC class III permissive change by adding frequency band and mode through software enabling to its original parent application. The adding frequency band is from 5.26 to 5.32GHz, 5.50 to 5.72GHz.

Both devices, original and updated versions, are electrically identical in all aspects except enabling frequency bands of 5260 ~ 5320 MHz and 5500 ~ 5720MHz.

Note: 1. No hardware change and no change to the original software for distribution and security procedure.
