

Here is the Lowest Gain per band and over all bands for the dipole:

	6.2GHz (UNII5)	6.5GHz (UNII6)	6.7GHz (UNII7)	6.9GHz (UNII8)
Highest Gain (dBi) w/ cable loss	5.06	4.71	4.49	5.34
Lowest Gain (dBi) w/ cable loss	3.72	4.49	4.25	4.55
Lowest Gain (dBi) over all bands	3.72			

The CBP report provided “210730-02.TR01 \_FCC WLAN 6GHz\_AX210D2W\_CBP\_Additionnal.pdf” is showing compliance down to -2dBi in each band.

So according the lowest Antenna gain declared this should show evidence that the DUT is compliant.
