

Request for Modular/Limited Modular Approval

Date: June 2, 2021				
Subject: Manufacturer's Declaration for	☑ - Modular Approval☐ - Limited Modular Approval	□ - Split Modu □ - Limited Sp		
Confidentiality Request for:	-			
	sic Requirements – FCC Part 15.212(
	Limited Module Description Must be l	Filled Out on the F		
1. The modular transmitter must have its ow does not have to rely upon the shielding p all modular transmitter emissions to comp between the RF circuitry of the module ar module is installed. Such coupling may re tuning capacitors may be located external	rovided by the device into which it is insoly with FCC limits. It is also intended to any wires or circuits in the device into sult in non-compliant operation. The ph	stalled in order for prevent coupling which the ysical crystal and	Require	<u>ment Met</u> ☐ - NO(*)
Details: The module contains a metal sh of the board next to antenna.	ield which covers all RF components a	nd circuitry. The s	hield is locate	d on the top
2. The modular transmitter must have buffer ensure that the module will comply with F or over-modulation. 15.212(a)(1)(ii)			⊠ - YES	□ - NO(*)
Details: No modulation / data inputs				
The modular transmitter must have its ow to ensure that the module will comply wit supplying circuitry in the device into which is the device into the	h FCC requirements regardless of the de	sign of the power	⊠ - YES	□ - NO(*)
Details: Voltage regulators on module o	r inside MCU and RF integrated circuit	t.		
4. The modular transmitter must comply wit 15.203, 15.204(b), 15.204(c), 15.212(a), a attached or employ a "unique" antenna c antenna, including the cable). The "profes applicable to modules but can apply to lin 15.212(a)(1)(iv)	and 2.929(b). The antenna must either be oupler (at all connections between the massional installation" provision of § 15.20	permanently odule and the 03 is not	⊠ - YES	□ - NO(*)
Details: The module has its own antenna	a soldered on the PCB			
5. The modular transmitter must be tested in inside another device during testing. This complying with Part 15 emission limits re Unless the transmitter module will be batt requirements found in Section 15.207. AC to the module must not contain ferrites, ur 15.27(a)). The length of these lines shall be unknown, at least 10 centimeters to insure and supporting equipment. Any accessorie module during testing shall be unmodified 15.212(a)(1)(v)	is intended to demonstrate that the modu gardless of the device into which it is ev- tery powered, it must comply with the AC or DC power lines and data input/outpu- nless they will be marketed with the mod- be length typical of actual use or, if that I that there is no coupling between the ca- es, peripherals, or support equipment cor-	ale is capable of entually installed. In conducted at lines connected alle (see Section ength is see of the module enected to the	⊠ - YES	□ - NO(*)
Details: The module was tested stand-alo	one as shown in test setup photographs	filed with this appl	ication	

Modular Approval Requirement			Requirement Met	
6.	The modular transmitter must be labeled with its own FCC ID number, or use an electron display (see KDB Publication 784748). If using a permanently affixed label with its own FCC ID number, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains FCC ID: XYZMODEL1." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization.	⊠ - YES	□ - NO(*)	
	If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. 15.212(a)(1)(vi)			
	Details: There is a label on the module as shown in the labeling exhibit filed with this application. instructions are shown in the installation manual filed with this application.	Host specific	e labeling	
7.	The modular transmitter must comply with all specific rule or operating requirements applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee. A copy of these instructions must be included in the application for equipment authorization. For example, there are very strict operational and timing requirements that must be met before a transmitter is authorized for operation under Section 15.231. For instance, data transmission is prohibited, except for operation under Section 15.231(e), in which case there are separate field strength level and timing requirements. Compliance with these requirements must be assured. 15.212(a)(1)(vii)	⊠ - YES	□ - NO(*)	
	Details: The module complies with FCC Part 15C requirements. Instructions to the OEM installer installation manual filed with this application.	· are provided	in the	
8.	The modular transmitter must comply with any applicable RF exposure requirements. For example, FCC Rules in Sections 2.1091, 2.1093 and specific Sections of Part 15, including 15.319(i), 15.407(f), 15.253(f) and 15.255(g), require that Unlicensed PCS, UNII and millimeter wave devices perform routine environmental evaluation for RF Exposure to demonstrate compliance. In addition, spread spectrum transmitters operating under Section 15.247 are required to address RF Exposure compliance in accordance with Section 15.247(b)(4). Modular transmitters approved under other Sections of Part 15, when necessary, may also need to address certain RF Exposure concerns, typically by providing specific installation and operating instructions for users, installers and other interested parties to ensure compliance. 15.212(a)(1)(viii)	⊠ - YES	□ - NO(*)	
	Details: The module meets mobile exclusion levels as shown in the RF exposure information filed	with this appl	lication.	

Limited Module Description – When Applicable

* If a module does NOT meet one or more of the above 8 requirements, the applicant may request Limited Modular Approval (LMA). This Limited Modular Approval (LMA) is applied with the understanding that the applicant will demonstrate and will retain control over the final installation of the device, such that compliance of the end product is always assured. The operating condition(s) for the LMA; the module is only approved for use when installed in devices produced by grantee. A description regarding how control of the end product, into which the module will be installed, will be maintained by the applicant/manufacturer, such that full compliance of the end product is always ensured should be provided here.

Details: N/A

Software Considerations – KDB 594280 / KDB 442812 (One of the following 2 items must be applied)			
Requirement	Requirement Met		
 For non-Software Defined Radio transmitter modules where software is used to ensure compliance of the device, technical description must be provided about how such control is implemented to ensure prevention of third-party modification; see KDB Publication 594280. 	□ - Provided in Separate Cover Letter	□ - N/A	
Details: The firmware of the device can not be modified or adjusted by the end user	:		
2. For <u>Software Defined Radio (SDR)</u> devices, transmitter module applications must provide a software security description; see KDB Publication 442812.	☐ - Provided in Separate Cover Letter	⊠ - N/A	
Details: <example -n="" a=""></example>			

Split Modular Requirements			
Requirement	Provided in Man	Provided in Manual	
1. For split modular transmitters, specific descriptions for secure communications between front-end and control sections, including authentication and restrictions on third-party modifications; also, instructions to third-party integrators on how control is maintained.	☐ - Provided in Separate Cover Letter	⊠ - N/A	
Details: <example a="" n="" –=""></example>			

OEM Integration Manual Guidance – KDB 996369 D03 Section 2

Clear and Specific Instructions Describing the Conditions, Limitations, and Procedures for third-parties to use and/or integrate the module into a host device.				
Dogwinomont	T			
Requirement				
Is this module intended for sale to third parties?	□ - YES	☐ - No, If No, and LMA applies, the applicant can optionally choose to not make the following detailed info public. However there still needs to be basic integration instructions for a users manual and the information below must still be included in the operational description. If the applicant wishes to keep this info confidential, this will require a separate statement cover letter explaining the module is not for sale to third parties and that integration instructions are internal confidential documents.		
Items	required to be in the ma	nual – See KDB 996369 D03, Section 2		
applicants should include information on treatment of the grantees own products and not following items can be placed.	ation in their instructions ace antenna design could intended for sale to third ed in the operational desc	nformation to be in the installation manual for all these items indicating clearly when indicate "Not Applicable".
