

From: Generic Office of Engineering Technology <oetech@fccsun27w.fcc.gov>
Subject: Response to Inquiry to FCC (Tracking Number 967148)
To: hotline@ATCB.com

Inquiry:

---Reply from Customer on 10/08/2007---

I believe the response to this was handled via email...However I have attached a copy of the response to this issue in an attachment.

Additionally, although PBA is not required for 15.239 any longer, per the FCC's response, all previous/pending PBA's should continue through this process. It is our understanding that this device has completed Pre-grant sampling and we may continue and finalize this application. Kindly confirm.

Thanks,

Tim

Response:

Yes, the XM Radio - Delphi; Model: XM2go; FCC ID: RS2A10113A has passed pre grant testing and may be granted by the TCB. Have the TCB contact Ray LaForge when you are ready and he can unblock the grantee code to allow the TCB to grant the application.
