Hello Wei,

This notice is for both FCC and IC applications.

Review is complete. Please reply to the following:

Q1: Please provide an internal photo exhibit.

Q2: Fiber Optic Distribution Systems are not FCC Equipment Class: AMP. Application Equipment Class will be changed to TNB.

Q3: For IC application, please provide a revised manual or separate attestation letter stating that the following statements will be included in the manual.

The user manual of transmitter devices equipped with detachable antennas shall contain the following information in a conspicuous location:

"This device has been designed to operate with the antennas listed below, and having a maximum gain of [x] dB. Antennas not included in this list or having a gain greater than [x] dB are strictly prohibited for use with this device. The required antenna impedance is [y] ohms."

Equipment manufacturers shall provide proper values of x and y to comply with the applicable RSS.

Immediately following the above statement, the manufacturer shall provide a list of all antennas acceptable for use with the transmitter.

Section [7.1.4](#). The following instructions in the user manual are also required:

"To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that permitted for successful communication."

Best regards,

Tim Dwyer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Hi, Tim.

Finally I got all the info of antenna and photos.

Sorry to take so long. Wish we can get this over with now:-)

Regards,

Wei
