Applicants attest that no party to this application is subject to a denial of Federal benefits pursuant to section 5301 of the Anti-Drug Abuse Act of 1988.

(6) A description of the transaction.

See Description of Transaction in Section II of this Application.

Accordingly, Glen Post holds a combined indirect interest of 28% in Magtel.

³ The Avery Companies, LLC (which is wholly owned by Ben Friedman) owns 3% of PhireLink and thereby an indirect 3% interest in Magtel. Ben Friedman also derives an indirect ownership interest of 43% in Magtel by holding 100% of the ownership of AC Fiber, LLC which in turn is an indirect 43% owner of Magtel. Accordingly, Ben Friedman holds a combined indirect interest of 46% in Magtel.

- (7) A description of the geographic areas in which the transferor and transferee (and their affiliates) offer domestic telecommunications services, and what services are provided in each area.**

Transferor, through the operations of Licensee, owns a network that provides broadband, voice and related services to customers in Logan and Yell Counties in Arkansas and provide service to the towns and communities of Waveland, Blue Mountain, Magazine and Sugar Grove.

Transferee owns Arkwest who owns a 100% FTTP network providing local and long-distance telephone and Broadband service to residents located in Yell, Scott, and Perry Counties in Arkansas. Attached as Exhibit C is a map showing Arkwest and Licensee's service area.

Transferee's parent company, PhireLink, owns Rebeltec, which provides high-speed fixed wireless broadband internet service to residential and business customers in Southeastern Colorado and Western Kansas. Rebeltec also holds some FCC wireless licenses. Rebeltec does not operate in the geographic service area being served by Magtel. PhireLink also owns Camellia, which provides high-speed fiber-based broadband internet services in St. Tammany Parish, Louisiana and Tammany Wireless which provides high-speed fixed wireless broadband internet services, both to residential and business customer in St. Tammany Parish, Louisiana. Transferee has no other licensed affiliates that provide regulated voice services.

- (8) A statement as to how the application fits into one or more of the presumptive streamlined categories in this section or why it is otherwise appropriate for streamlined treatment.**

Applicants do not believe that this Application is eligible for streamlined processing pursuant to Section 63.03(b)(2) but the Applicants respectfully request expedited treatment of the Application due to the fact that the Transaction will not result in the change in the terms of service for any customer.

- (9) Identification of all other Commission applications related to the same transaction.**

None.

- (10) A statement of whether the applicants are requesting special consideration because either party to the transaction is facing imminent business failure.**

Applicants are not requesting special consideration.

- (11) Identification of any separately filed waiver requests being sought in conjunction with the transaction.**

Applicants are not seeking any waivers in conjunction with this Transaction.

- (12) A statement showing how grant of the application will serve the public interest, convenience, and necessity, including any additional information that may be necessary to show the effect of the proposed transaction on competition in domestic markets.**

The Transaction described herein will serve the public interest. The financial, technical, and managerial resources that Transferee will bring to Magtel will further enhance Magtel's ability to compete in the telecommunications and broadband services marketplace. Transferee's management team has substantial experience in managing companies that offer telecommunications and broadband to residential and business customers. Transferee is legally, technically, and financially qualified to own and operate Magtel as proposed in the Agreement. The Transferee's management team already has experience in managing an incumbent local exchange company in Arkansas through its wholly owned subsidiary Arkwest. Transferee's experience with Arkwest has generated operational efficiencies and service improvements that are expected to benefit Magtel following the Transaction. These include enhanced network planning and deployment capabilities, improved procurement scale for equipment and services, centralized back-office functions (including billing, customer support, and regulatory compliance), the launch of new product offerings, and access to experienced technical personnel. In addition, the Transferee has demonstrated the ability to integrate and operate rural telecommunications networks while maintaining service continuity and investing in broadband infrastructure upgrades, including fiber deployment and modernization initiatives. These efficiencies are expected to support continued reliable service and position Magtel for future network enhancements.

At the same time, the proposed Transaction will have no adverse impact on Magtel's current customers. Immediately following the Transaction, those customers will continue to receive their existing services at the same rates, terms, and conditions as at present. Any future changes to the rates, terms, and conditions of service will be made consistent with Commission requirements. The only significant change following the closing of the Transaction from the customers' perspective will be that Transferee will be the new owner of Magtel.

Furthermore, the proposed Transaction does not present any anti-competitive concerns. The acquisition of Magtel by Transferee will not have an adverse effect on competition in the markets for local, intrastate toll, or domestic interstate telecommunications services. The Transferee and its affiliates do not currently offer local, intrastate toll, or domestic interstate telecommunications services in the service areas currently serviced by the Licensee so the Transaction will not diminish competition. Furthermore, Applicants will face fierce competition from established service providers in these markets.

(5) Certification pursuant to §§ 1.2001 through 1.2003 of this chapter that no party to the application is subject to a denial of Federal benefits pursuant to section 5301 of the Anti-Drug Abuse Act of 1988. *See* 21 U.S.C. 853.

Applicants attest that no party to this application is subject to a denial of Federal benefits pursuant to section 5301 of the Anti-Drug Abuse Act of 1988.

(6) A description of the transaction.

See Description of Transaction in Section II of this Application.

² GP3 Holdings, LLC (which is wholly owned by Glen Post) owns 4% of Fiber Holdings and 3% of PhireLink and thereby an indirect 7% interest in Magtel. Glen Post also derives an indirect ownership interest of 22% in Magtel by holding 50% of the ownership of LA Holdings which in turn is an indirect 43% owner of Magtel. Accordingly, Glen Post holds a combined indirect interest of 28% in Magtel.

³ The Avery Companies, LLC (which is wholly owned by Ben Friedman) owns 3% of PhireLink and thereby an indirect 3% interest in Magtel. Ben Friedman also derives an indirect ownership interest of 43% in Magtel by holding 100% of the ownership of AC Fiber, LLC which in turn is an indirect 43% owner of Magtel. Accordingly, Ben Friedman holds a combined indirect interest of 46% in Magtel.

- (7) A description of the geographic areas in which the transferor and transferee (and their affiliates) offer domestic telecommunications services, and what services are provided in each area.**

Transferor, through the operations of Licensee, owns a network that provides broadband, voice and related services to customers in Logan and Yell Counties in Arkansas and provide service to the towns of Waveland, Blue Mountain, Magazine and Sugar Grove.

Transferee owns Arkwest who owns a 100% FTTP network providing local and long-distance telephone and Broadband service to residents located in Yell, Scott, and Perry Counties in Arkansas. Attached as Exhibit C is a map showing Arkwest and Licensee's service area.

Transferee's parent company, PhireLink, owns Rebeltec, which provides high-speed fixed wireless broadband internet service to residential and business customers in Southeastern Colorado and Western Kansas. Rebeltec also holds some FCC wireless licenses. Rebeltec does not operate in the geographic service area being served by Magtel. PhireLink also owns Camellia, which provides high-speed fiber-based broadband internet services in St. Tammany Parish, Louisiana and Tammany Wireless which provides high-speed fixed wireless broadband internet services, both to residential and business customer in St. Tammany Parish, Louisiana. Transferee has no other licensed affiliates that provide regulated voice services.

- (8) A statement as to how the application fits into one or more of the presumptive streamlined categories in this section or why it is otherwise appropriate for streamlined treatment.**

Applicants do not believe that this Application is eligible for streamlined processing pursuant to Section 63.03(b)(2) but the Applicants respectfully request expedited treatment of the Application due to the fact that the Transaction will not result in the change in the terms of service for any customer.

- (9) Identification of all other Commission applications related to the same transaction.**

None.

- (10) A statement of whether the applicants are requesting special consideration because either party to the transaction is facing imminent business failure.**

Applicants are not requesting special consideration.

- (11) Identification of any separately filed waiver requests being sought in conjunction with the transaction.**

Applicants are not seeking any waivers in conjunction with this Transaction.

- (12) A statement showing how grant of the application will serve the public interest, convenience, and necessity, including any additional information that may be necessary to show the effect of the proposed transaction on competition in domestic markets.**

The Transaction described herein will serve the public interest. The financial, technical, and managerial resources that Transferee will bring to Magtel will further enhance Magtel's ability to compete in the telecommunications and broadband services marketplace. Transferee's management team has substantial experience in managing companies that offer telecommunications and broadband to residential and business customers. Transferee is legally, technically, and financially qualified to own and operate Magtel as proposed in the Agreement. The Transferee's management team already has experience in managing an incumbent local exchange company in Arkansas through its wholly owned subsidiary Arkwest. Transferee's experience with Arkwest has generated operational efficiencies and service improvements that are expected to benefit Magtel following the Transaction. These include enhanced network planning and deployment capabilities, improved procurement scale for equipment and services, centralized back-office functions (including billing, customer support, and regulatory compliance), the launch of new product offerings, and access to experienced technical personnel. In addition, the Transferee has demonstrated the ability to integrate and operate rural telecommunications networks while maintaining service continuity and investing in broadband infrastructure upgrades, including fiber deployment and modernization initiatives. These efficiencies are expected to support continued reliable service and position Magtel for future network enhancements.

At the same time, the proposed Transaction will have no adverse impact on Magtel's current customers. Immediately following the Transaction, those customers will continue to receive their existing services at the same rates, terms, and conditions as at present. Any future changes to the rates, terms, and conditions of service will be made consistent with Commission requirements. The only significant change following the closing of the Transaction from the customers' perspective will be that Transferee will be the new owner of Magtel.

Furthermore, the proposed Transaction does not present any anti-competitive concerns. The acquisition of Magtel by Transferee will not have an adverse effect on competition in the markets for local, intrastate toll, or domestic interstate telecommunications services. The Transferee and its affiliates do not currently offer local, intrastate toll, or domestic interstate telecommunications services in the service areas currently serviced by the Licensee so the Transaction will not diminish competition. Furthermore, Applicants will face fierce competition from established service providers in these markets.
