File No. SAT-MOD-_____
Call Sign S3083

APPLICATION TO MODIFY AUTHORIZATION OF GALAXY 34

Intelsat License LLC (“Intelsat”), pursuant to Section 25.117 of the Federal Communications Commission’s (“Commission” or “FCC”) rules,¹ hereby seeks modification of the authorization for Galaxy 34 (S3083)² to allow C-band coverage flexibility. No other change is being sought. Grant of the instant application is in the public interest because it will allow the Galaxy-34 satellite to better meet changing customer demands.

Specifically, Intelsat requests authority to operate in the 3700-4200 MHz (space-to-Earth) and 5925-6425 MHz (Earth-to-space)³ bands with coverage different than that described in the Schedule S GXT files provided in the application for the *Galaxy 34 Authorization* to better meet changing customer demands. Intelsat seeks limited flexibility to depart from the nominal pointing of the CAHU, CAVU, CAHD and CAVD C-band beams within the envelope defined by the red

¹ 47 C.F.R. § 25.117.

² See *Intelsat License LLC Application to Launch and Operate Galaxy 34 (S3083)*, ICFS File No. SAT-RPL-20210325-00039 (granted Oct. 21, 2021) (“*Galaxy 34 Authorization*”).

³ See *Expanding Flexible Use of the 3.7 to 4.2 GHz Band*, Report and Order and Order of Proposed Modification, 35 FCC Rcd 2343 (2020) (“*C-band Order*”); 47 C.F.R. § 2.106, NG 182. Intelsat will continue to operate the Galaxy 34 satellite in accordance with the Commission’s *C-band Order* and Footnote NG182 of the U.S. Table of Frequency Allocations.

This composite isoline would include (but would not be limited to) the original pointing and coverage reflected in the GXT files provided in the original Galaxy 34 application as well as the coverage that the satellite is currently authorized for under a grant of Special Temporary Authority.⁴

Intelsat certifies that apart from the change in coverage described in this Application, all other parameters of Galaxy 34's operations remain unchanged from those authorized in the *Galaxy 34 Authorization*. Intelsat's proposed operations will conform to existing coordination agreements and the FCC's rules governing operations vis-à-vis adjacent locations. Should any interference occur, Intelsat will take all reasonable steps to eliminate such interference.

For the reasons set forth above, Intelsat respectfully requests that the Commission grant the modification requested herein.

Respectfully submitted,
