AMENDMENT TO RESTATED AND AMENDED APPLICATION

On June 15, 2026, RTI Solutions, Inc. d/b/a HMB Solutions (“HMB Solutions” or “Licensee”), BOC-LA1 LLC (“BOC”), and Forager Holdings Corp. (“Forager”) (collectively “Applicants”) filed a restated and amended application for Commission consent to the transfer of indirect control of HMB Solutions, the holder of the Cable Landing License for the JGA North submarine cable system (File No. SCL-LIC-20181106-00035), from certain of its existing shareholders to BOC, which in turn would be directly owned and controlled by Forager (“Restated Application”). The Applicants have since determined that, for internal management as well as external financing purposes, instead of becoming a direct subsidiary of Forager, BOC is better suited as an indirect subsidiary of Forager and a direct subsidiary of TeleGuam Holdings, LLC (“GTA”), itself an indirect, wholly owned subsidiary of Forager. The Applicants file this amendment to update the Restated Application.

This is the only substantive change to the Restated Application. It does not alter the ultimate ownership or control of BOC or, upon consummation, of HMB Solutions—Forager remains the ultimate parent, no new direct or indirect interest holder is introduced at any level, and no foreign ownership is introduced. The Applicants therefore respectfully submit that this

amendment is minor and does not warrant any of the requirements of a “major amendment.” All other information provided in the Restated Application remains the same and is incorporated by reference. For the avoidance of doubt, the ownership information provided under Section 63.18(h) of the Commission’s rules and the post-consummation ownership diagrams attached to the Restated Application are revised to show BOC as a direct subsidiary of GTA rather than of Forager. The transferee of control remains BOC, and Forager remains the ultimate parent. The qualifications of Forager and GTA have already been reviewed and approved by the Commission.¹ To graphically show the change made by this amendment, Applicants attach an exhibit with ownership diagrams showing the ownership structure as initially proposed in the Restated Application and as revised by this amendment.

The transaction will serve the public interest and will not result in any loss or impairment of service for any JGA North submarine cable system customer and will have no adverse effects on competition in Guam, the rest of the United States, or abroad. Indeed, the existing HMB Solutions management remains in place, and it is anticipated that they will continue to operate the company once the transfer of indirect control is approved by the Commission. This transaction also serves the public interest by allowing HMB Solutions to potentially enjoy access to the financial resources and management expertise of BOC, Forager, and their affiliates, which will ultimately benefit HMB Solutions’ customers as well as customers of the JGA North submarine cable system.

The Applicants respectfully request that the Restated Application, as amended by this filing, continue to be afforded streamlined treatment pursuant to Sections 1.70014 and 1.70016

¹ See Public Notice, International Authorizations Granted, Section 214 Applications (47 C.F.R. § 63.18); Section 310(b) Requests, 32 FCC Rcd. 5490, 5491 (2017).

of the Commission's rules.² A prompt and expeditious grant of this application will significantly advance the public interest.³

Respectfully submitted,

BOC-LA1 LLC and Forager Holdings Corp.
