**RE: EXPEDITIONS COMMUNICATIONS LLC
MOBILE VSAT NETWORK IN GUAM
EARTH STATION LICENSE APPLICATION**

Dear Ms. Rosenworcel,

We are pleased to file this application with the Federal Communications Commission (FCC) on behalf of Expedition Communications LLC (Expedition Communications) for a license to operate a mobile VSAT station in Guam.

Expedition Communications is a satellite services company with one focus being on connecting remote or underserved locations. In Guam, the Expedition Communications VSAT will serve to supplement the First Responder Network (FirstNet) there, providing additional resiliency for emergencies. FirstNet is the nation's communications network dedicated to emergency responders and the public safety community, creating a single, nationwide broadband network specifically for first responders. Full technical and other details are set out in the attached documentation for FCC's consideration. We are most grateful for the timely review of this application.

The law firm of Hyde & Associates specializes in satellite regulatory issues and has been retained by Expedition Communications to ensure compliance of its network with applicable regulations. As such, we are at the full disposal of the FCC for any additional information that may be required.

Best Regards,

Christian Hyde
Director
