---

My sincere apologies for the error- as you surmised I obviously transposed 32 degrees to 23.

The subject dish is the white object just west of your marker. To be most accurate the coordinates really should be 32-29-34.94 N 93-45-56.**72** W.

Thank you for giving us this easy opportunity to correct a clerical error.

**John Collinson**
