

Haras Development

E181423

Request for 30-day Special Temporary Authority

By this application for Special Temporary Authority (“STA”), Haras Development (“Haras”) seeks authority to add space station Capella-9 (Call Sign S3137) as an additional point of communication to its fixed earth station located in Dublin, Ohio (the “Dublin Earth Station”; Call Sign E181423).¹

Capella-9 shares radiofrequency characteristics with prior-licensed space stations Capella-3, Capella-4, Capella-5, Capella-7, and Capella-8,² which the Commission has previously granted STA for Haras to add as points of communication.³

The Dublin Earth Station would communicate with Capella-9 utilizing the following frequencies:

TT&C Uplink

Center Frequency: 2036 MHz

Emission Designator: 1M40F1D

Polarity: RCHP

TT&C Downlink

Center Frequency: 8027 MHz

Emission Designator: 1M40F1D

Polarity: RHCP

Max EIRP Per Carrier (dBW): 4.5

Max EIRP Density Per Carrier (dBW/4 kHz): -21.0

Payload Downlink

Center Frequency: 8212.5 MHz

Emission Designator: 338MG1D

Polarity: RCHP, LCHP, or RHCP+LHCP

Max EIRP Per Carrier (dBW): 26.0

Max EIRP Density Per Carrier (dBW/4 kHz): -22.0

Grant of this STA will serve the public interest by facilitating systematic and efficient use of resources by satellite network operators and service providers, enabling Earth exploration satellite service (“EESS”) customers to focus on satellite and customer operations by minimizing deployment and/or management of their own ground infrastructure and allowing Haras to provide that service instead. This managed network provides for an increase in coordination and spectral efficiency in the EESS service, as the Dublin Earth Station can be utilized to maximum efficiency among Haras’s client constellations. Prompt grant will enable Haras to provide spectrally efficient ground network solutions that facilitate a growing use of EESS services.

For the reasons set forth above, Haras respectfully requests that the Commission grant this STA application.
