| <b>Scope of Grant:</b>                                            | RBC Signals, LLC ("RBC Signals"), is granted a 60-day special temporary authority (STA), to operate its 3.9m satellite earth station to conduct telemetry, tracking, and command (TT&C) and payload transmissions with the Anduril-216 (WA9X00) satellite.                                 |                                                                                                                                                                                                                    |
| <b>Service Area(s):</b>                                           | 70° 11' 28.7" N, 148° 26' 0.93" W in Deadhorse, AK                                                                                                                                                                                                                                         |                                                                                                                                                                                                                    |
| <b>Frequencies:</b>                                               | <p>Operations will be performed at the following center frequencies:</p> <p>2070 MHz with an emission bandwidth of 156.25 kHz, 1.625 MHz, and 2.5 MHz (Earth-to-space)</p> <p>8075 MHz with an emission bandwidth of 25 MHz, 30 MHz, 31.25 MHz, 33.33 MHz, and 38 MHz (space-to-Earth)</p> |                                                                                                                                                                                                                    |

**Operations under this grant must comport with the legal and technical specifications set forth by the applicant or petitioner and with Federal Communication Commission's rules not waived herein. This grant is also subject to the following conditions:**

1. STA operations must not exceed the operational power levels and parameters requested and coordinated.
2. STA operations must use the minimum power level necessary to establish communications links in order to minimize potential interference to licensed users.
3. All operations under this grant of STA must be on an unprotected and non-interference basis (NIB), i.e., RBC Signals must not cause harmful interference to and must not claim protection from interference caused to it by any other lawfully operating station.
4. In the event of any harmful interference caused by operations under this grant of STA, RBC Signals must immediately cease operations upon notification of such interference. RBC Signals must immediately inform the Commission, in writing, of such an event.
5. Earth station transmissions in the 2025–2110 MHz band are subject to prior coordination with the local Society of Broadcast Engineers, Inc. (SBE) frequency coordinator. Consult the list at <https://sbe.org/resources/frequency-coordination/> to find the appropriate coordinator.
6. RBC Signals must ensure that ANDURIL-216 transmissions centered at 8075 MHz are ceased and no earth station receive operations are permitted when the conjunction angle formed by the location 64° 53' 00" N 147° 30' 00" W (angle vertex), the ANDURIL-216 spacecraft, and any of the following spacecraft is less than or equal to 5 degrees: Aura (NORAD ID: 28376), Aqua (NORAD ID: 27424), ICESat-2 (NORAD ID: 43613), Landsat-8 (NORAD ID: 39084), Landsat-9 (NORAD ID: 49260), OCO-2 (NORAD ID: 40059), SMAP (NORAD ID: 40376), and Terra (NORAD ID: 25994).

7. The 24/7 point of contact in the United States, with authority and ability to cease all emissions, for this operation is RBC Signals Operations at [john.ames@rbcsignals.com](mailto:john.ames@rbcsignals.com), or +1 (719) 502-6206.

8. STA operations must be in compliance with earth station applicable operations allowed by the space station authorization(s) or grant(s), including all relevant conditions, waivers, and findings therein.

This grant is issued pursuant to section 0.261 of the Commission's rules on delegated authority, 47 CFR § 0.261, and is effective upon release. This STA is authorized pursuant to the Commission's rule 47 CFR § 25.120.
