

Attachment 1
REQUEST FOR SPECIAL TEMPORARY AUTHORIZATION
(Response to Question 12)
Call Sign E160161

Viasat, Inc. (“Viasat”) hereby requests extension of its existing special temporary authority (“STA”), for an additional one hundred and eighty (180) days, to continue to operate its licensed transmit/receive earth station in Pendergrass, GA, with the Weather Constellation NGSO system operated by The Tomorrow Companies, Inc. (“Tomorrow.io”).¹ Grant of the requested STA would continue to serve the public interest for the same reasons specified in the underlying application, including by enabling critical telemetry, tracking and control communications links to the Weather Constellation.

Viasat has filed an application for modification of its Pendergrass, GA earth station license to permit communications with the Weather Constellation using portions of the 2025-2110 MHz (Earth-to-space) and 8025-8400 MHz (space-to-Earth) band segments.² Viasat seeks STA to enable continued communications with the Weather Constellation while that modification application remains pending. All operations under the STA would continue to be consistent with the technical parameters set forth in Viasat’s pending modification application and with the terms and conditions of the space station authorization held by Tomorrow.io.

Viasat would continue to operate pursuant to the STA on a non-protected, non-harmful interference basis. In the unlikely event of harmful interference caused by Viasat’s operations under the STA, Viasat would take steps to eliminate such interference, including termination of transmissions if needed. The U.S. point of contact available 24 hours a day, seven days a week, with authority and ability to cease emissions is:

349 Inverness Drive South
Englewood, CO 80112
Tel: 720-493-7300

1 This request is an extension of a previous grant of special temporary authority and would have been filed within the customary period but for the government shutdown. *See* Viasat, Inc., Call Sign E160161, SES-STA20241230-02747 (granted Apr. 24, 2025).
